**Parts Availability** **Retrofit Solutions** **Exceptional Service & Training Support**

VAN DORN DEMAG is your OEM aftersales source for Van Dorn and Demag injection molding machine parts, retrofit solutions, service, training and support.

Machines we service and support include:

- Van Dorn HT, HP, Spectra, Caliber, Integra, Praxis, Cadence, ET and ET Pro Series and Classic toggles
- Newbury verticals
- Demag IntElect, El-Exis, Systec, Extra, System, Multi and Titan Series

Beyond traditional parts and service, there are many ways our organization can help improve the productivity and profitability of your injection molding operation. We have developed solutions that can increase energy efficiency, expand processing capabilities and improve control, clamp, and injection unit productivity.

We can also provide attractive financing options as well as assistance with energy rebates, state-level energy programs, and government grants.

To find out the best ways VAN DORN DEMAG can help your molding operation, just give us a call today at **866.491.1045**.

[Strongsville, OH] ... Van Dorn Demag, the North American OEM aftersales organization of Demag Plastics Group, is pleased to announce the launch of its new website, [www.vandorndemag.com](http://www.vandorndemag.com).

“We created this website to help our customers make the most of the machinery that is already in their plants,” said John F. Martich III, Vice President, Demag Plastics Group. “New machinery acquisitions represent a very small percentage of the machinery in most plants. Yet on most websites, aftersales products and services are basically an afterthought. The fact is there are a wide variety of ways we can help Van Dorn and Demag customers improve the productivity of their existing machinery. This website provides a more visible resource that our customers can access for this information.”

The website is focused on providing Van Dorn and Demag machinery

## **Van Dorn Demag Launches New Website...Page Two**

customers with a user-friendly resource for a wide range of aftersales information on parts, retrofit, service and training. Some of the sections of the new website that molders will find helpful include:

- Limited-time special offers on replacement parts, service and retrofit solutions
- Ways Van Dorn Demag can help customers save on energy costs
- Available retrofit options by machine model including HT, HP, Classic, IntElect, EI-Exis and many other models
- Information on how the VDU<sup>®</sup> Control optimizes uptime and performance
- Access to the Online Store where customers automatically receive a 2% discount
- Easily accessed specifications and preventive maintenance information on machines including Newbury and other legacy Van Dorn machines
- Financing information for parts, retrofits and machines, including special machine pricing

To visit the new website, go to [www.vandorndemag.com](http://www.vandorndemag.com).
